Customer Journey Map

SCENARIO	ENTICE	ENTER	BROWSE	SELECT DETAILS	SUBMIT REQUEST	APPROVAL	DECISION	IF APPROVED	IF REJECTED	COMPLETE	EXTEND
Automating Corporate Network Resource Requests using ServiceNow	Need Network Resource	Open ServiceNow Portal	Open Network Catalog	Complete Request Form	Submit Catalog Item	System Administrator Approval	Approval Outcome	Database Update & Approval Email	Rejection Notification	Network Resource Provisioned	Request History
What does the person (or group) typically experience?	• Employee realizes they need a network connection or device for work.	• Employee logs in to the ServiceNow Employee Service Portal.	• Employee browses available network request options in the catalog.	• Employee enters device_type, connection_type, address, and user_name in the request form.	• ServiceNow creates the request record and Flow Designer is triggered.	• Approval request is sent to System Administrator. • Administrator reviews the request.	• Administrator approves or rejects the request.	• Flow Designer inserts record into u_network_database and sends approval email (Emerald Green).	• Rejection email is sent to the requester with the reason (Crimson Red).	• Requested network resource is provisioned and ready to use.	• Employee can view previous requests and their status history.
At each step, what is a person's primary goal or motivation? ("Help me..." or "Help me avoid...")	Help me get the required network resource quickly.	Help me access the request portal easily.	Help me choose the correct network request.	Help me submit an accurate and complete request.	Help me know my request has been received successfully.	Help me receive approval quickly.	Help me get a clear decision on my request.	Help me know that provisioning has started successfully.	Help me understand why my request was rejected.	Help me start using the network resource immediately.	Help me track my previous requests and their status.
Interactions What digital touchpoints or physical objects would they use? Places: Where are they? People: Who do they see or talk to?	Things: • Laptop • Awareness (Email / Communication) Place: • Office / Remote Workplace People: • Employee	Things: • ServiceNow Portal Place: • Browser People: • None	Things: • Service Catalog Place: • ServiceNow Portal People: • None	Things: • Catalog Form (device_type, connection_type, address, user_name) Place: • ServiceNow Portal People: • Employee	Things: • ServiceNow Request Record • Flow Designer Place: • ServiceNow Platform People: • None	Things: • Approval Task (SystemNow) Email Place: • ServiceNow Platform People: • System Administrator	Things: • Approval Task Place: • ServiceNow Platform People: • System Administrator	Things: • u_network_database table • Approval Email Place: • ServiceNow Platform People: • System (Flow Designer)	Things: • Email (Rejection) Place: • ServiceNow Platform People: • System (Flow Designer)	Things: • Network Access (Switch / Router) Place: • Corporate Network People: • Employee • IT Team	Things: • Request History Dashboard Place: • ServiceNow Portal People: • Employee
What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?	Easy access to ServiceNow portal.	Single Sign-On login makes access simple.	Well-organized catalog with clear categories.	Dropdown choices and validations reduce errors.	Instant request submission confirmation.	Automated approval workflow.	Clear visibility of approval or rejection.	Automatic database update and instant approval email.	Immediate rejection notification.	Network resource is provisioned quickly.	Centralized history for all requests.
What steps does a typical person find frustrating, confusing, angering, costly, or time-consuming?	Unsure which request type to choose.	Too many catalog items can be confusing.	Terminology or options may be unclear.	Missing or incorrect information.	No immediate visibility of status.	Approval delays.	Waiting for approval or rejection.	Database insertion failure.	Not knowing the reason clearly.	None.	Limited analytics and reporting.
How might we make each step better? What ideas do we have? What have others suggested?	Provide request recommendations and clear descriptions.	Create a dedicated "Network Resource Requests" category.	Add descriptions and examples for each item.	Real-time validation and auto-fill user information.	Show submission confirmation with request ID.	Automatic reminders and escalations.	Display approval progress and status updates.	Automatic retry mechanism for failed inserts.	Provide clear rejection reason and allow one-click resubmission.	Collect feedback on the experience.	Dashboard with request metrics and filters.
